

CAPABILITY STATEMENT

Drilling and Professional Services

2023

ABOUT US

Cygnet Drilling is a multidisciplinary drilling and consulting business that operates in Australia's Southeast. With offices in Bendigo Victoria and Wagga Wagga New South Wales, Cygnet Drilling is positioned to provide expert drilling services in regional areas to a standard that you would expect from the big cities.

Cygnet Drilling is committed to providing a quality service that can be maintained as we grow.

From our experience in the industry and the expectations of our clients we understand the importance of balancing production, safety, people and quality outcomes. In doing this we can create a strong reputation in the southeast for dependability in our solutions and create a great team to work for.

We offer our clients more than just drilling, with expert add on services that compliment our work, we can add value to projects and give our clients confidence in selecting a professional contractor to work with.

GEOTECHNICAL & ENVIRONMENTAL CAPABILITY

We utilize leading tablet data collection software and fully equipped geotechnical drilling rigs that can be deployed with a site engineer as a full-service drilling and testing package.

Now you can win and complete regional work in Victoria and New South Wales with digital logs and data to your inbox the same week.

Cygnets Drilling has experience and involvement in large infrastructure projects with leading engineering consultancies. In our careers we have successfully drilled and logged drill holes to depths of over 2000m.

We offer a tracked Hanjin 8D drilling rig solution that has a small footprint with coring and SPT capabilities. The rig is fit for purpose and ready to comply for major project standards.

Our environment and contamination services provided by environmental drillers and qualified environmental scientist include:

- Direct Push sampling with AMS or Geoprobe tooling
- Design and installation of Class 1 Groundwater Monitoring Bores
- Development of bores, ongoing groundwater monitoring programs with sampling and reporting
- Field screening and soil vapor installations
- Hand auger, concrete coring, tight access sampling
- Clear well diagrams and logs with tablet logging software

DIAMOND DRILLING **EXPERTISE**

- Deep diamond drilling consulting services
- Hole Steering
- Directional Diamond Drilling
- Drilling Management
- Troubleshoot downhole issues

HEALTH, SAFETY, ENVIRONMENT **COMMITMENT**

We operate under safe methods of work and use critical thinking and risk assessment to achieve an accident free workplace.

Drillers hold minimum Class 1 Water License for the relevant state water authority, Certificate III Drilling Operations and Rail Industry Worker (RIW) card with training to safely work in the rail corridor.

Cygnets Drilling understand the value and interest that the community and other stakeholders have in preserving the locations that we operate in. The reduction and elimination of contaminants that may impact the land, groundwater and environmental disturbance is a critical focus.

We are committed to working safely and towards ongoing industry education and learning that we understand is gained through training and development for management and our staff.
